Free Career Training at Your Fingertips

SWEEPS Secure Programming Training (Strengthen Workforce Education for Excellence in Programming Securely) is a collaboration between the National Centers for Academic Excellence in Cybersecurity (NCAE-C), a coalition of cybersecurity initiatives, and top-ranked universities and community colleges to teach software developers how to increase code security without sacrificing efficiency.

What You'll Get

- **Scholarships**—NCAE-C-funded program free for accepted applicants with military or first responder experience
- **Flexible**—Online workshops, bootcamps and certificates
- **Training for All Levels**—From career changers to expert software developers

What You'll Learn

- High-demand skills in secure software development, secure programming and testing, and cybersecurity
- The latest data security standards
- How to reduce security vulnerabilities in software, systems and infrastructure
