NCAE CYBERGAMES

SO, WHO WON?

LITERALLY EVERYONE.

NCAE Cyber Games Sandbox

Mini Hacks by C2 Games

Deployed

Running

Description

How to Play

Users are challenged to configure various VMs to follow a topology and check in with a scoring server for accuracy. The first Mini Hack tier challenges users to deploy similar technologies as the actual competition such as a Linux router and website. In the future, additional tiers will become available that incorporate other services, practice CTF challenges, and quirky problems to troubleshoot and remedy. We recommend users get together with their other club members and take on the Mini Hack challenges... then reset everything and try to do it again as a team even faster! These are critical skills that each team member should experience prior to competition day!

Launch Environment

Capture The Flag by C2 Games

Description

How to Play

Users are presented a series of challenges of varying difficulty across several security domain categories. Challenges are presented on a Jeopardy-style scoreboard consisting of categories such as cryptography, reverse engineering, and trivia. The goal of each challenge is to use the information provided to solve ("capture") the challenge and submit the answer ("flag").

Deploying...

CRACKING CTF'S

Deep-dives into Capture the Flag challenges with James Rice, Mike Lisi, and other special guests.

Enjoying these? You can also catch them **live** on **Twitch TV**. Be sure to follow us to be notified when we go live!

Crypto 201

Follow along as CTF Creator Mike Lisi and James Rice solve a Cryptography CTF challenge from our live sandbox, Crypto 201. Mike also gives a background about Cryptography, and why Cryptography is important in Cyber Security.
