Internet of Things Security and Privacy: Challenges and Advantages

Mark your calendar and come join us for CAE Forum! CAE Forum is a live, real-time, online, academic forum where members of the CAE community give non-technical presentations on topics of value to the CAE community. CAE Forum is about sharing your ideas, knowledge, and expertise to empower and strengthen our community. It's that simple. CAE Forum presentations are normally held on the third Wednesday of each month during the Fall and Spring semesters.

Date: May 15, 2019

Time: 1:10-1:50pm ET

Just log in as "Guest" and enter your name. No password required.

Title/Topic: Internet of Things Security and Privacy: Challenges and Advantages

Audience: Students, Professors, Govt.

Presenter(s): Thaier Hayajneh, Fordham University

Description:

The development of improved wireless communication technologies has ushered in the age of the Internet of Things, which features a proliferation of newly-smart devices that operate in heterogeneous, often complex, and mobile-friendly networks. However, the growth of IoT networks has not been uniform or standardized, and many IoT devices have been released with incomplete or inappropriate security features into environments that do not facilitate good practices for security and privacy. Thus, this talk will educate current and upcoming cybersecurity professionals about how the IoT operates, what threats it faces, and how to best protect IoT devices and networks.

A recording of the live presentation will be available within 48 hours of the presentation at:
