

# FLORIDA STATE COLLEGE AT JACKSONVILLE

## Florida State College at Jacksonville's (FSCJ)

Associate in Science (A.S.) in IT Security degree program is for individuals interested in beginning or advancing a career in computer/network security. This hands-on program focuses on digital forensics, intrusion detection, penetration testing, scripting, and networking. The program provides students the skills needed to investigate computer, cyber, and electronic crimes and focuses on digital forensics techniques and procedures, assuring that digital evidence is accurate, complete, and reliable. Students with specific current industry-recognized certifications such as CompTIA's A+, Security+, Microsoft, and Cisco may receive credit for the associated college credit course.

FSCJ Center for Cyber Security works to advance the practice and public awareness of information technology (IT) security through education and

service. Our faculty offer guidance to students, members of different academic disciplines across the College, local government, and industry partners.

In 2018, FSCJ hosted a five-day hands-on summer camp for teenage students in Jacksonville interested in cybersecurity. The camp was developed by FSCJ, FBI Jacksonville cyber squad, and Infragard. The students worked with FBI agents during the summer camp and helped them understand the importance of behaving responsibly online. The camp also provided a hands-on, behind-the-scenes access to some of the FBI's work, a SWAT demonstration with special agents in full uniform, remote controlled robots, and life-saving equipment. The camp introduces boys and girls from ages 14 to 17 to the world of cybersecurity. It showed them all the opportunities available for those who want a future in cybercrime fighting.

## DESIGNATIONS

- CAE – Cyber Defense 2-Year Education
