

With nearly one in five Americans falling victim to a cybercrime, the demand is high for skilled analysts with cutting-edge knowledge of how to detect, prevent, and recover from a cyberattack. Designed for both working professionals and students, **Fordham University's** unique, one-year Master of Science Program in Cybersecurity is delivered in the heart of New York City through a combination of weekend, evening, online, and hybrid courses — taught by leading experts in academia and industry. This program offers small classes and close mentorship in recently renovated lab space at both our Bronx and Manhattan campuses.

Using methods in computing and informational science, engineering, and social science, our students learn how to identify solutions to global cyber threats while mastering legal, ethical, and policy issues in this critical field of study. Fordham's core

curriculum is designed to focus exclusively on cybersecurity, which provides students with the depth of knowledge and formal training that is ever more vital to employers across the professional cybersecurity landscape. Our graduates are fully-prepared to help protect commercial networks, critical information infrastructure, and national security information systems; and, can feel confident that their academic program will prepare them to compete successfully for rewarding careers in this growing and lucrative field.

**Fordham's Center for Cybersecurity** offers an intellectual home for cybersecurity students and faculty, and for the broader Bronx community. This interdisciplinary center brings together diverse members of the Fordham community to promote educational, research, and service projects in the area of information and computer security that benefit our neighbors and fellow New Yorkers.
