

Since its inception in 2003, **Oklahoma City Community College's (OCCC)** Cyber/Information Security program strives to prepare students for many in-demand cybersecurity positions. Graduates have obtained positions in both private industry and government positions throughout Oklahoma and surrounding states.

In April 2010, OCCC was among the first six, 2-year institutions to receive the designation as a National Center of Academic Excellence in Cyber Defense Two-Year Education (CAE-2Y). We are proud that OCCC has continued to maintain this designation until 2021. This prestigious designation validates the education received by OCCC students.

OCCC offers an Associate degree and a Certificate of Mastery in Cyber/Information Security. Classes offer an offensive and defensive approach to cybersecurity

and topics covered include computer operating systems and hardware, computer programming, database systems, information security principles, network security and administration, secure e-commerce, enterprise security management, and cyber forensics. Students are also prepared for industry preferred cybersecurity related certifications.

OCCC students are provided a hands-on and well-rounded experience to develop their knowledge that is geared towards meeting industry needs. This is achieved through classroom lectures, labs inside and outside the classroom, in-class student presentations, individual and group research projects, guest lectures, Cyber Club meets, and National Cyber League Competitions. OCCC also hosts monthly InfraGard and quarterly Information Systems Security Association (ISSA) to further align its program with industry needs.
