MORGAN STATE UNIVERSITY

Morgan State University's Network Information and Embedded Systems Security Center of Academic Excellence (NIESS-CAE) is designed to provide a portal through which our students and faculty can learn about reducing vulnerabilities in our national information infrastructure. Morgan has a commitment to the development of academic programs in support of a Cyber Security Center of Excellence. Certificate options are being developed for the Electrical Engineering, Computer Science and Information Science and Systems Departments. Within the Electrical Engineering program, there are currently four options, based on academic level, that a student can take as a pathway to cybersecurity learning.

We have established a process that provides programs in the field of cyber defense education at the graduate and undergraduate levels; continuously improves the quality of our cyber defense program, curriculum, faculty and students; and provides the nation with a pipeline of qualified students eager to become cyber defense professionals.

With this process in place, we expect to produce a growing number of professionals with expertise in various cyber defense disciplines. Morgan has one of the highest graduation rates of African-American electrical engineers and we hope to open the cybersecurity market to this community.

DESIGNATIONS

• CAE-Cyber Defense Education
