Complimentary Cyber Range Speed Course for Faculty

Hyper-Realistic Simulation Training for Cybersecurity Educators

Become a professional cyber range instructor and educator in this 5-day complimentary course

Metropolitan State University (MSU) is offering a complimentary 5-day workshop for educators and faculty who are interested in learning about the innovative concept of educating with the Cyberbit cyber range. The workshop is designed for educators that are interested in using a cyber range and want to augment their knowledge and teaching qualifications for cybersecurity students. The first three days of the workshop will cover the introductory and intermediate levels and the last two days will be for advanced levels. Workshop participants will learn how to create and manage realistic cybersecurity scenarios, assess student progress according to the NICE and MITRE ATT&CK frameworks, and identify skill gaps. MSU’s cybersecurity program uses Cyberbit, the world’s most advanced cybersecurity skills development platform for delivering the theoretical knowledge and hands-on experience students need to succeed in the workforce. This workshop is ideal for faculty who want to stay ahead of the curve in cybersecurity education. It is led by experienced Cyberbit instructors who are passionate about cybersecurity education. Participants will walk away from the workshop with the knowledge and skills they need to use Cyberbit’s cyber range to teach and train their students effectively, providing them with the skills required to succeed in today’s cybersecurity landscape.

Diverse training options and capabilities

- Individual and team practice.
- Commercial security tools & enterprise networks.
- Train beginner to advanced levels.
- Post exercise quizzes & automatic assessments conducted via the platform.
- Cloud platform – asynchronous and synchronous learning.

5-Day Workshop Content
Intro/Intermediate Workshop: September 13-15, 2023, 8:30 AM - 3:30 PM CST
Advanced Workshop: September 28-29, 2023, 8:30 AM - 3:30 PM CST

Leveraged by Higher Education Institutions Globally

About Cyberbit
Cyberbit provides hands-on cybersecurity education and training and addresses the global cybersecurity skill gap through its world-leading cyber range platform. Colleges and universities use the Cyberbit range to increase student enrollment and retention, industry organizations, and position their institution as regional cybersecurity hubs by providing simulation-based learning and training. The Cyberbit platform delivers a hyper-realistic experience that immerses learners in a virtual security operations center (SOC), where they use real-world security tools to respond to real-world, simulated cyberattacks. As a result, it prepares students for their careers in cybersecurity from day-one after their graduation and reduces the need to learn on the job. Cyberbit is headquartered in Israel with offices in the U.S, Europe and Asia.
