

University of Mary Campus

The **University of Mary**, a distinguished private Catholic institution, offers a transformative educational experience amidst the majestic landscape of the Missouri River in Bismarck. Deeply rooted in Benedictine values, the university is committed to cultivating purpose-driven leaders who are equipped to serve with profound impact. With a vibrant community of over 3,800 students, Mary provides a comprehensive range of nearly 60 bachelor's, 15 master's, and five doctoral programs.

University of Mary's Bachelor of Science in Cybersecurity degree was designed with input from cybersecurity experts and a local advisory board of community leaders to meet the ever-changing workforce demands, aligning with Department of Homeland Security (DHS) and National Security Agency (NSA) guidelines. Our degree delivers a hands-on, industry-informed curriculum focused

on real-world applications. Students gain expertise in areas like network defense, ethical hacking, computer forensics, and cyber defense strategy, all taught by experienced faculty from the cybersecurity field.

The university's Cybersecurity Center serves as a hub for innovation and education, offering students practical learning experiences and community outreach opportunities.

UMary's Cybersecurity program offers a flexible and personalized approach. To meet the student in their learning path, UMary offers stackable online certificates in Cybersecurity Foundations, Cybersecurity Analyst, Secure Network Administration, and Systems Administration — all of which can be applied toward the bachelor's degree. A Master's Cybersecurity stackable certificate is available.

DESIGNATIONS

- CAE-Cyber Defense

Through its comprehensive and values-driven approach, the University of Mary is preparing the next generation of ethical, capable cybersecurity professionals ready to meet today's digital challenges.
