Open Source Intelligence in Cybersecurity (1:10-1:50pm ET)

Mark your calendar and come join us for CAE Forum! CAE Forum is a live, real-time, online, academic forum where members of the CAE community give non-technical presentations on topics of value to the CAE community. CAE Forum is about sharing your ideas, knowledge, and expertise to empower and strengthen our community. It's that simple. CAE Forum presentations are normally held on the third Wednesday of each month during the Fall and Spring semesters.

Date: Wednesday 13 Dec 2017

Time: 1:10-1:50pm ET

Location: https://caecommunity.zoom.us/my/caeforum

Title/Topic: Open Source Intelligence in Cybersecurity

Audience: Students, Professors, Govt.

Presenter(s): Anastacia Webster, California State University, San Bernardino

Description:

Whether they are reading information on Facebook, searching old friends or colleagues on google, researching for a term paper online, or hunting for employees on platforms like LinkedIn, most individuals already engage in some form of OSINT collection and analysis in their daily lives. However, the real value added to the field of cybersecurity in teaching individuals how to use OSINT is that they are able to evaluate the vulnerability of an individual or company directly from the information they provide online. Individuals can often find

sensitive/confidential, private, and personal information through the process of enumeration, aggregation, and deduction that can help them protect individuals or exploit targets. In addition, by teaching individuals to use OSINT in cybersecurity, we can open the door to larger discussions of privacy and ethics regarding open source information. This workshop is going to go introduce OSINT in cybersecurity and open the discussion on privacy and ethics.

CAE Forum is also recorded

A recording of the live presentation will be made available for the world to see at the following address:
